

MCB 5671-2 Characterization of microbial communities by 16S rRNA gene sequencing

Dates: Jan 5-6th, Jan 9-11th, 2023

Times:

Jan 5th 1:00 PM to 7:00 PM

Jan 6th, Jan 9-11th 9:00 AM to 5:00 PM

Instructors: Kelly Crandall and
Brandon O'Sullivan

Coordinator: Joerg Graf
2 credits

- Learn how to prepare 16S rRNA libraries for next generation sequencing
- Learn how to how to analyze the data using Qiime 2 (Quantitative Insights into Microbial Ecology) to construct publishable figures and tables .
- **Open to all graduate and qualified undergraduate students**
